Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The claims are differentiated from the art of record because they recite a composition comprising undifferentiated human ES cells proliferating on an extracellular matrix instead of feeder cells, and in a medium conditioned by fibroblast feeder cells, and thus the claims are neither anticipated nor obvious. The following method steps for screening a substance are well-known in the art and would not require undue experimentation to practice with the novel composition of cells and culture media.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
